Nature of dividends - Dividends are paid from current income and available earnings, after required transfers to reserves at the end of a dividend period.

Compounding frequency - Dividends will be compounded monthly.

Crediting frequency - Dividends will be credited into this account monthly.

Dividend period - For this account type, the dividend period is monthly. For example, the beginning date of the first dividend period of the calendar year is January 1 and the ending date of such dividend period is January 31. All other dividend periods follow this same pattern of dates. The dividend declaration date is the same as the ending date of a dividend period, and for the example above is January 31.

Daily balance computation method - Dividends are calculated by the daily balance method which applies a daily periodic rate to the balance in the account each day.

Accrual of dividends on noncash deposits - Dividends will begin to accrue on the business day you place noncash items (for example, checks) into your account.

Minimum balance to open - The minimum balance required to open this account is \$2,000.00.

Minimum balance to obtain the disclosed annual percentage yield - You must maintain a minimum daily balance of \$2,000.00 in your account each day to obtain the disclosed annual percentage yield.

The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.
